## DESIGN BOARD

A Design-board

That allows multiple ways of visual communication.

Three functions in one model:

- Enamel Whiteboard
- Flipover hooks
- Paper roll holder (up to A1 size)

As whiteboards may also be beautiful

-especially because they are big, eye-catching and placed in very beautiful interiors – It is therefore that Struts is designed as a furniture object.

A premium finishing touch, made of satin-coated metal and enamel, makes STRUTS like an homeliving object.

Sustainable and circular, and manufactured in the Netherlands.

Biophilic in design, with an iconic silhouette: an ostrich \* from the side (\* STRUTS in Swedish), though with clear lines making it a beautiful cross of Scandinavian and Dutch design (De Stijl Rietveld).

Innovative:

Unique in her paper, to pull over the board or over the table, to roll out and roll up thoughts, ideas, plans, leaving the high-quality enamel board accessible.

Nicely to place against the wall or free-standing in the room, thanks to its fold-out legs.

For those requesting extra mobility the leg can be provided with swivel wheels.

Lets STRUTS be also your innovation buddy, who invites you to write on, to draw on and look at her, for more innovation fun!
